

**PATIENT/CARER REMINDER CARD**

<p>((Front Cover))</p> <p><b>Important Safety Reminders for Patients taking Deferiprone tablets</b></p> <p>Prescribing doctor:</p> <p>Phone No:</p>	<p>((Back Cover))</p> <p><b>FOR WOMEN OF CHILDBEARING AGE</b></p> <p>Do not take Deferiprone tablets if you are pregnant or if you are trying to become pregnant. If taken during pregnancy, Deferiprone tablets may seriously harm the unborn baby.</p> <p>You must use effective contraception while you are taking Deferiprone tablets. Ask your doctor which method is best for you. If you become pregnant while taking Deferiprone Tablets, stop taking the medicine immediately and tell the doctor. Do not take Deferiprone tablets if you are breastfeeding.</p>
<p>((Inside 1))</p> <p><b>MONITORING YOUR WHITE BLOOD CELL COUNT WITH DEFERIPRONE TABLETS</b></p> <p>There is a small chance that you may develop agranulocytosis (very low white blood cell count) while taking Deferiprone tablets, which may lead to a serious infection. Even though agranulocytosis only affects 1 to 2 out of 100 users, it is important to monitor your blood on a regular basis.</p>	<p>((Inside 2))</p> <p>Make sure you do the following:</p> <ol style="list-style-type: none"><li>3. Have your blood monitored on a weekly basis.</li><li>4. Contact your doctor immediately if you develop a fever, sore throat or flu-like symptoms.</li></ol>
